

# DIGITAL SISONIC™ MICROPHONE WITH MULTIPLE PERFORMANCE MODES

The SPK0838HT4H-1 is a miniature, high-performance, low power, top port silicon digital microphone with a single-bit PDM output. Using Knowles' proven high performance SiSonic™ MEMS technology, the SPK0838HT4H-1 consists of an acoustic sensor, a low noise input buffer, and a sigma-delta modulator. These devices are suitable for applications such as cellphones, smart phones, laptop computers, sensors, digital still cameras, portable music recorders, and other portable electronic devices where excellent wideband audio performance and RF immunity are required. The high Signal-to-Noise Ratio (SNR) of the SPK0838HT4H-1 enhances the performance of far-field applications and many complex, multi-microphone algorithms. In addition, the SPK0838HT4H-1 offers multiple performance modes.
