1. Purpose

To improve production efficiency and better serve our customers, C&K will be transferring a number of production lines from our facility in Huizhou, China to Yen My, Vietnam. This move will be done in several phases.

This notification only relates to products to be moved in phase 2. A separate notification will be issued for products that will be moved in other phases.

Please see the list of affected part numbers in the attached appendix.

Production of the affected parts will stop in Huizhou in Mid-September 2019 and start back up in Mid-November 2019 in our Vietnam facility.

C&K have put in place a number of actions to minimize potential disruption caused by this move. Safety stock levels are being prepared in order to cover the transition period, so we can continue shipments with minimal disruption.

2. Change details

2.1. Technical Impact

The manufacturing transfer will not affect product specification, product certification or product approvals.

Requalification of products will be required and performed prior to the restart of production and a re-qualification report will be available for customers upon request. As a result of the move there will be a change in marking on UL qualified products, an example of which can be seen below:
